

Disposable and biodegradable PLA and cardboard glasses

Disposable and biodegradable PLA and cardboard glasses

Whether for hot, cold or even frozen drinks Usobio glasses are the perfect eco-friendly solution.

Usobio offers two types of glasses: one made from PLA and the other one from cardboard and PLA. To complete the beverage product line, Usobio can supply biodegradable drinking straws making separate waste collection easier and faster.

PLA glasses resist up to 45° C - 113° F and are only suitable for cold drinks. Cardboard and PLA glasses resist up to 95° C - 203° F and can be used in microwaves.

Cold-resistant down to -45° C - 49.0° F, PLA glasses can be used in fridges or freezers.

Water-resistant, Usobio glasses are ideal for both hot and cold liquids.
